BHIMA CHETAN

SOFTWARE DEVELOPER

PROFESSIONAL SUMMARY

Computer Science graduate with six months of production software development experience at Hindustan Aeronautics Limited, working across an Angular frontend, .NET Web API backend, and PostgreSQL data layer. Comfortable in Python, Java, C#, and SQL, with practical exposure to Docker, AWS, and CI/CD from building and deploying personal projects end-to-end.

EXPERIENCE

SOFTWARE DEVELOPER INTERN, HINDUSTAN AERONAUTICS LIMITED, HYDERABAD Jan 2026 – June 2026

- Contributed across the stack on an internal enterprise web application — Angular (TypeScript, RxJS, reactive forms) on the frontend, REST APIs via a .NET Web API backend, and PostgreSQL on the data layer.
- Built reusable, responsive UI components — dynamic data tables, dialogs, multi-step forms — and integrated them with backend REST endpoints.
- Implemented Excel import/export end-to-end, from UI through to backend document generation, improving reporting reliability.
- Diagnosed and fixed defects across a multi-role approval workflow spanning frontend logic, backend validation, and database queries.
- Collaborated with engineering and operations stakeholders on requirements, testing cycles, and iterative delivery.

SOFTWARE ENGINEER INTERN, UNIFIED MENTOR, VIRTUAL June 2025 – September 2025 (4 months)

- Collaborated in a distributed Agile team to analyze user needs and develop software features accordingly.
- Used Git and Jira for version control and issue tracking, supporting continuous integration and team coordination.
- Authored test cases and resolved defects during QA cycles, enhancing product stability.
- Demonstrated adaptability and strong communication in a fast-paced, multi-location project environment.

MOBILE APPLICATION DEVELOPER INTERN | ANITHA DIARY PRODUCTS, HYDERABAD
June 2024 – August 2024 (3 months)

- Developed a mobile application to streamline operational data collection and reporting for dairy operations.
- Gathered requirements from stakeholders to implement features that improved data accuracy and reporting efficiency.
- Conducted end-to-end testing and assisted in deployment, ensuring smooth user adoption.

PROJECTS

FESTLY Personal Project (Launching Soon) · festly.co.in

- Building a commission-free sports events booking platform in Next.js/TypeScript with PostgreSQL via Drizzle ORM.
- Implemented payment verification, fraud detection, and encrypted host-to-booker chat.
- Self-hosted with Docker Compose, GitHub Actions CI/CD, and Sentry monitoring.

SMART PRESENCE AI Personal Project · github.com/Bhima-Chetan/smart-presence-ai

- Built a facial-recognition attendance system in Python (Flask, OpenCV) with a SQLite backend, reporting layer, and admin dashboard.
- Containerized with Docker and deployed across Render, Vercel, and Railway.

EDUCATION

ICFAI TECH SCHOOL, 2026

Computer science and engineering

B.tech

SKILLS

LANGUAGES:

- Java, Python, C#, TypeScript
- JavaScript, SQL

FRONTEND:

- Angular (RxJS, signals, reactive forms)
- Next.js, React, HTML5, CSS3
- PrimeNG / Angular Material

BACKEND & DATABASES:

- .NET Web API, Flask, REST APIs
- PostgreSQL, Oracle, SQLite

TOOLS & CLOUD:

- Git/GitHub, Jira, Agile
- Docker, GitHub Actions CI/CD
- AWS (EC2, S3, IAM, VPC), Linux
